

Complete Stimulus List

IRBNet Protocol #2446127-1

*Cognitive Warrant: A Framework and Pilot Methodology for
Evaluating Semantic Alignment in Controlled Vocabularies*

Nicholas Meister (PI) | Faculty Sponsor: Dr. Krystyna Matusiak
Morgridge College of Education, University of Denver

This document lists all sentences that consulting librarians and study participants may encounter across the stimuli validation process and both surveys in the pilot testing. **Part A** lists the 115 target words drawn from Trott and Bergen’s (2023) stimulus set, each with two senses and four sentences (two per sense), sorted alphabetically. **Part B** lists the 112 filler word pairs (224 sentences total) used in Experiment 1 only, drawn directly from Trott and Bergen (2023), sorted alphabetically.

Part A Target Word Stimuli (Librarian validation, Survey 1, and Survey 2)

Each tile shows one target word. **N** = Noun; **V** = Verb. Sense 1 sentences (S1a, S1b) and Sense 2 sentences (S2a, S2b) are the prime–target pairs used to instantiate each word sense. Words are sorted alphabetically. n = 115 words; 230 word senses; 460 sentences.

act N · Polysemy Sense 1: S1a. It was a desperate act. S1b. It was a humane act. Sense 2: S2a. It was a magic act. S2b. It was a comedic act.	appeal N · Polysemy Sense 1: S1a.
